Re: *Space Exploration Holdings, LLC, IBFS File No. SAT-MOD-20200417-00037*

Dear Ms. Dortch:

This is to inform you that, on June 16, 2020, representatives of Space Exploration Holdings, LLC ("SpaceX") had a conference call with members of the Commission's International Bureau to discuss the above referenced application to modify SpaceX's existing authorization to deploy and operate a non-geostationary orbit ("NGSO") satellite system.¹ SpaceX began by expressing its appreciation for the Bureau's oversight of orbital debris mitigation issues. SpaceX has now provided two rounds of supplemental information in response to questions from the staff, and looks forward to seeing the same level of scrutiny applied to other pending NGSO applications before they are acted upon. SpaceX then provided an overview of its progress to date in deploying its Starlink constellation and the steps over the next several months that will lead to launch of beta service in the United States.

Sincerely,

/s/ David Goldman
